

HeyJobs on AWS

[HeyJobs](#) aims to make job searching and recruitment more effective for candidates and employers. Founded in 2016, the startup uses artificial intelligence (AI) to power its talent platform. Always looking for new ways to boost operational agility and improve experiences, it chose Amazon Web Services (AWS) as the cloud provider that matched its focus on innovation. With scalable compute capacity, HeyJobs handles millions of job-candidate matches and cuts infrastructure costs by 30 percent. While applying best practices in the cloud helps it comply with General Data Protection Regulation (GDPR). AI and machine learning are key to HeyJobs' advantage in a fast-moving sector, and with services such as [Amazon SageMaker](#) it can accelerate projects that keep it ahead of the competition.
