

Norstella on AWS

Norstella’s mission as a pharmaceutical intelligence specialist is to transform lives by helping its clients accelerate drug development and time to market. The company—formed through the merger of Citeline, Evaluate, MMIT, Panalgo, and The Dedham Group—uses Amazon Web Services (AWS) to support this process. By participating in the AWS Migration Acceleration Program (AWS MAP), Norstella moved its infrastructure to the cloud in just 5 months, establishing a foundation for innovation with generative artificial intelligence (AI) and solutions such as Amazon Bedrock. And through Panalgo it developed analytics service Instant Health Data (IHD) Cloud using AWS Fargate and Amazon EMR. This gives customers the power to process patient data faster and speed up time to insight.

Migration

2023

Norstella Builds an Enterprise in Months

Norstella worked with [GlobalLogic](#), an [Amazon Web Services \(AWS\) Partner](#), to migrate 25 AWS accounts in less than 5 months using the [AWS Migration Acceleration Program \(AWS MAP\)](#). AWS, Norstella can explore new technology service [Amazon Bedrock](#).

Hi, I can connect you with an AWS representative or answer questions you have on AWS.
