“The most exciting thing [about] having a broad portfolio of services.”

For Deutsche Fußball Liga (DFL), as for fans across the world, soccer is about more than 90 minutes of play. It’s about passion. And emotion. And, increasingly, data. The company extended its collaboration with Amazon Web Services (AWS)—its Official Technology Provider since 2020—to harness the power of data and generative artificial intelligence (AI) for the business and the Bundesliga soccer leagues that it runs. With support from AWS AI experts, DFL is identifying game-changing solutions, helping it cut costs, gain greater insight, and enhance experiences for fans.
