PGA TOUR Delivers Win, Cut Probability Analytics Across Multiple Platforms using Amazon ECS with AWS Fargate

Learn how the PGA TOUR built a novel ML-powered analytics model on AWS which provides real-time insights to its audience and creates an immersive viewing experience.

The [PGA TOUR](#) introduced Win, Cut Probability, a novel ML-powered analytics model that provides real-time insights into the likelihood of outcomes during a tournament. To support this, the PGA TOUR leveraged AWS infrastructure, and serverless services, the 'AWS Well-Architected Framework' to advance in and winning a tournament. Using Amazon ECS with AWS Fargate, they can run thousands of simulations and process results in real-time. By leveraging the elasticity of AWS, they can run their model quickly and scale their infrastructure management to AWS.
