United Airlines Powers Seamless Customer Experience During Travel Disruptions with AWS Serverless Containers

Learn how United Airlines was able to quickly scale a new feature on its mobile application to respond to surges in customer usage.

[United Airlines](#) is a global airline that transports over 500,000 customers per day to 460 airports worldwide. United Airlines set out to build and deploy a new feature on its mobile app called "Delays and Cancells" that gave customers more control over their travel plans during disruptions. In the event of a weather event, customers had the opportunity to rebook their tickets, get vouchers, book hotels, and more directly in the app. By using [Amazon Elastic Container Service \(ECS\)](#) and [AWS Fargate](#), United Airlines could launch the app quickly and automatically scale in response to surges.
