A leading live commerce business, [Home Shopping Europe](#) (HSE) has built its reputation on providing entertaining shopping experiences. Across its three TV channels, it reaches 46 million households in Germany, Austria, and Switzerland—offering thousands of products, from household goods to jewelry. The retailer transformed its monolithic ecommerce platform using Amazon Web Services (AWS) and is now looking to use generative artificial intelligence (AI), exploring Amazon Bedrock and Amazon CodeWhisperer to further enhance customer interactions. Data protection, says Julian Gruber, the company’s senior director of ecommerce and digital technology, is critical. And HSE likes knowing that, using AWS, customer data is secure.

Leading Cloud Innovators in Europe

Learn how leading organizations in Europe across industries trust AWS to drive innovation at every level of their business.
