

Ryanair on AWS

Ryanair’s business model is simple: keep costs low and customer satisfaction high. The airline—Europe’s largest—operates 3,600 flights a day to destinations in over 40 countries. An Amazon Web Services (AWS) customer, Ryanair embraces cloud technology to drive efficiency and innovation. Using Amazon Bedrock, the company developed an employee app that’s improved satisfaction and productivity. Its systems engineers realized savings of 65 percent and increased backup reliability with AWS Storage Gateway. And, using Amazon SageMaker machine learning service, customer care agents have more time to deliver the human touch wherever it’s needed. In addition, Ryanair can forecast demand for tea, ham and cheese paninis, and chocolate croissants on any given flight route by analyzing data with a custom-designed algorithm.

[Ryanair](#) continues to revolutionize the airline industry, focusing on cloud-driven value and service. Using Amazon Web Services (AWS) technology—from backup solutions to machine learning innovation—the airline is supporting better employee and customer experiences, running the business with greater efficiency, and preparing the runway for growth.

Artificial Intelligence

Ryanair Improves Customer Support Using Amazon SageMaker

As part of Ryanair's customer care improvement initiative, it developed a solution to liberate agents from routine enquiries, giving them more time to solve problems that require a human touch. The airline worked with [Cation Consulting](#), an [Amazon Web Services \(AWS\) Partner](#), to build a chatbot using [Amazon SageMaker](#) and [Amazon Lex](#).

We wanted to leverage AI technology powered by AWS in order to boost our customer support experience."

Ryanair & Cation Consulting Designed and Built a Chatbot That Improves the Customer Support Experience

In this AWS Partner Network video, head of service design at Ryanair Lee Reddin, and Alan Kiernan, CTO and cofounder of [Cation Consulting](#), an [Amazon Web Services \(AWS\) Partner](#), talk about how they built a customer-centric solution to better meet passengers' needs. The chatbot, which uses [Amazon SageMaker](#) and [Amazon Lex](#), has handled more than 3 million conversations in multiple languages.

[Watch the video on AWS Partner Network TV »](#)

Cation Consulting's approach was to put itself in the shoes of Ryanair passengers and build a solution powered by Amazon Lex and Amazon SageMaker that answers Ryanair's specific needs."
