WHY BUNDESLIGA CHOOSES AWS

Bundesliga, Germany's premier national football league, is using AWS to deliver real-time statistics that improve insights into game strategy and outcomes, and recommend personalized content for their 500 million global fans and partners across multiple channels. They are using AWS ML services including Amazon SageMaker, Amazon Personalize, and Amazon Rekognition and analytics to improve the broadcast product and are exploring new distribution formats to increase the global Bundesliga fan base, while transforming its business operations to help the league and its clubs build services, automate processes, enhance its use of data, and be more cost efficient.

1

Engaging and Delighting Fans

By using AWS, the Bundesliga is providing advanced real-time statistics and in-depth insights called Bundesliga Match Facts, and will bring personalized experiences to its fans. With over 500 million Bundesliga fans around the world, they will gain more advanced insights into players, teams, and the league because AWS's leading technology will deliver a more personalized experience and the next generation of statistics.

2

Enhancing the Broadcast Product

Bundesliga uses AWS machine learning, AI, analytics, and other innovative technologies to improve the broadcast product and explore new distribution formats to increase the global Bundesliga fan base. By using AWS Media Services, Bundesliga games are being streamed with more flexibility and interactivity than ever to global fans, live and time-shifted within the event-stream on the IP-enabled device viewers prefer.

3

Improving Business Operations

With AWS, Bundesliga will transform business operations to help the league and clubs build services, automate processes, enhance data usage, and be more cost efficient, while better understanding the outputs of what is produced. By working with AWS Professional Services, Bundesliga has already reduced operational costs by 75% with a highly scalable serverless streaming infrastructure.
