

Continental on AWS

From one of the most recognized tire brands in the world to a connected mobility pioneer, Continental has seen success from 1871 to today thanks to its constant evolution. Using Amazon Web Services (AWS), the company has embraced the cloud and accelerated a software-driven vision. It built modular solution Continental Automotive Edge (CAEdge), which connects vehicles to the cloud and provides a virtual workbench to speed development from weeks to hours. And, by embarking on an organization-wide upskilling program and engaging with AWS Skills Guild, thousands of employees have generated more than 100 innovative business proposals. For Continental, investing in cloud capabilities means investing in its future as a key provider of intelligent connectivity for the automotive industry.

Continental Builds Automotive Software Platform on AWS, Cuts Processing Time from Months to Hours

Continental's digital transformation in the fast-moving automotive sector has seen it create new solutions that represent the future of the industry. Like its Continental Automotive Edge (CAEdge) framework, which connects vehicles to the cloud, speeding up the software development process and providing a platform to deliver next-generation automotive services. Built in 6 months, CAEdge has cut data processing time from months to hours.

Continental Cuts Data Processing Time in Development Platform for Automotive Software on AWS

Continental built its Continental Automotive Edge (CAEdge) modular hardware and software solution in 6 months using Amazon Web Services (AWS). With cloud-based functionality, development tasks that would take weeks before are now done in hours. And processing time for the entire data pipeline is completed in 15 minutes compared to up to 10 days.
