Energy storage and e-mobility company Atlante is breathing new life into electronic vehicle infrastructure across southern Europe. Building from scratch in the Amazon Web Services (AWS) Cloud, it uses serverless and fully managed services that have helped it grow and innovate sustainably and at pace. Data scientist Laura Monforte talks about how Atlante teams are using generative artificial intelligence (AI) and services such as [Amazon Q](#) and [Amazon Bedrock](#). And how being able to track carbon emissions means the startup keeps to its core value of protecting the planet, while increasing efficiency and saving money.
