

United Airlines on AWS

United Airlines is leading modernization in an industry that's embracing change. The largest airline globally by number of seat miles, its mission is to "Connect People, Uniting the World." Migrating tens of hundreds of applications to Amazon Web Services (AWS) has helped the business accelerate innovation, even in the midst of challenging market conditions. From supporting its technology team to save \$2 billion and boosting developer productivity 40 percent, to using generative artificial intelligence (AI) to streamline passenger record processes and save months of manual effort. With services such as [Amazon Bedrock](#), [AWS IoT Core](#), and [Amazon DocumentDB](#), United Airlines is transforming passenger experiences, increasing efficiency and security, and shaping the intelligent airport of tomorrow.

For [United Airlines](#), innovation is about creating the best passenger experiences. From machine learning and analytics to scalable compute and security capabilities, Amazon Web Services (AWS) Technology has helped United reach great outcomes. Some recent achievements are award-winning apps, reduced emissions, and millions of dollars in savings.

AWS re:Invent 2023

Intelligent Airport Operations Powered by Generative AI with United

A lot goes on behind the scenes to make airport experiences frictionless, says Rob Bence, Director of Digital Technology. And it's United Airlines' goal to deliver the best end-to-end airport journey possible. Using AWS and generative artificial intelligence (gen AI), the airline empowers customers with real-time, personalized day-of-travel information.
