Overview

[TD SYNnex](#), an IT solutions company, is on a mission to connect innovators with technology, its specialized knowledge. Although the company has been distributing Amazon Web Services (AWS) products and its

own solutions for years, it knew that it could go further in helping its partners achieve more. By offering Road to Select, a customizable AWS training program, TD SYNEX helped unlock new opportunities, increasing revenue and improving sales performance for itself and its partners.

Opportunity | Using AWS Training and Certification to Assist Partners for TD SYNEX

TD SYNEX is a distributor and solutions aggregator that empowers IT innovators with the technology that they need to achieve positive outcomes. Its portfolio spans three areas: edge solutions such as consumer electronics; advanced solutions such as infrastructure, hybrid cloud, and software; and specialized services such as consultancy and education. Globally, TD SYNEX serves more than 200,000 customers in more than 100 countries.

To grow its reputation as a trusted adviser to its partners, TD SYNEX set out to offer more professional services and solutions. Its goals included expanding its operations as an AWS Distributor in Poland and the surrounding region. The company wanted to help its customers—AWS Partners—on their AWS journeys with specialized, up-to-date knowledge with which they could better understand AWS services and best practices. First, TD SYNEX worked with [AWS Training and Certification](#)—which equips teams with the practical cloud skills needed to unlock the full value of AWS services—to train its own employees. Then, the company aimed to pass along the benefits of AWS Cloud training to its customers.

In 2021, TD SYNEX designed a program called Road to Select to assist AWS Partners in obtaining [AWS Certifications](#), closing skills gaps, and meeting the requirements to advance in the AWS Partner Program. The main goal of our program was to help our partners generate opportunities through achieving AWS

Advanced Tier status,” says Kamil Staśko, business development manager at TD SYNEX. “Having AWS Certifications can differentiate a company in the market and help it gain new customers.”

Solution | Building a Training Program for TD SYNEX and Its Partners

Through collaboration with AWS Partner Training and Certification, TD SYNEX does more than just offer a list of training courses; it personalizes training based on its partners’ experience levels and specializations. It even has different tracks for specific job functions—such as system administrators and sales—which is a crucial feature for closing skills gaps. “We aim to help our partners grow as simply and as quickly as possible,” says Staśko. “We adapt the program and training to the partner’s needs to find the best path forward for its business.”

TD SYNEX hosts the online 4-week Road to Select training program twice a year and runs other online and on-site training programs continuously. The program begins at a basic level and gradually progresses to more advanced topics. Individuals can join the ongoing program at any time. “It’s up to the partner to decide where they start their journey and what training they want to accomplish,” says Staśko. “The idea is that anyone who joins the program will finish at the right stage to put their new knowledge into practice.”

Over time, TD SYNEX has adapted its training strategy by setting up a virtual learning center for on-demand content tailored to its partners’ needs. The online learning center was based on [AWS Skill Builder](#), which consists of more than 600 courses that help professionals advance their goals and gain experience in AWS. It has also created a new program called Cloud Practice Builder for partners focused on strategy, go-to-market sales, and technical training.

The Road to Select program benefits both TD SYNEX and its partners. By working with AWS Training and Certification, TD SYNEX has improved operational productivity and helped its teams better understand AWS. As a result, the teams can discuss potential projects and opportunities for partners with confidence. Partners gained knowledge about AWS through training as they worked toward AWS Certifications. “Our partners want to grow and earn a higher status,” says Staśko. “They start with AWS Training and Certification, then they can upgrade to the next level and achieve partner tier requirements.”

Outcome | Increasing TD SYNEX’s Revenue by 1,108% and

TD SYNEX and its partners benefited from training and certification in terms of revenue. Between 2021 and 2023, TD SYNEX's revenue in Poland increased by 1,108 percent. Its partners report a 95 percent reduction in lost sales opportunities, which indicates improved sales performance.

After training, TD SYNEX stays in touch with its partners to help them put their new knowledge into practice. For this purpose, TD SYNEX organized a Partner Prospecting League, which is a campaign managed using AWS best practices that helps partners generate leads after training and certification.

Since 2021, around 500 people have participated in the training. [AWS Certified Cloud Practitioner](#)—which validates a foundational, high-level understanding of AWS Cloud, services, and terminology—was the most popular AWS Certification earned through the program.

In addition, three of TD SYNEX's partners upgraded to the Select Tier of the AWS Partner program in 2022, followed by another eight upgrades in 2023. "We want to help as many AWS Partners as possible achieve Select and Advanced Tier status," says Staśko. "Then, they can secure more customers and business opportunities."

TD SYNEX's personalized AWS Training and Certification program continues to improve and expand. The company is developing new training programs in response to demand from its partners. For example, TD SYNEX is planning training for generative artificial intelligence in early 2024.

"The training program gives our partners confidence," says Staśko. "AWS Training and Certification has empowered our partners to pursue new project ambitions and business opportunities."

About TD SYNEX

TD SYNEX is a solutions aggregator in the IT sector. It provides edge solutions, advanced solutions, and specialized services. As an innovative partner, it helps its customers get the most out of their technology and investments.
