

Delivery Hero

Delivery Hero on AWS

Delivery Hero went from an ambitious idea to the leading local delivery company. With the mission to deliver anything, straight to customer's doors, Delivery Hero began building on Amazon Web Services (AWS) about a month after its launch. It is now on the forefront of innovation, operating a network of brands in 70 countries across four continents.

FEATURED STORY

Delivery Hero's Global Success Relies on Local Data Compliance Using AWS

Talabat Improves Database Reliability by 60%, Boosts App Performance by 20% Using Amazon Aurora and Amazon ElastiCache

Since its inception in 2004, Talabat, an online food delivery company, has been experiencing steady growth. In 2020, Talabat's main SQL server database reached 2.5 TB and was growing rapidly. However, as the company grew, its on-premises monolithic infrastructure was beginning to experience latency and connectivity issues. The company chose AWS to run the Talabat app due to the diverse set of services that AWS offers.
