

Accor on AWS

Accor hotels group strives to go above and beyond its customers' expectations and provide each of them with inspiring and personalized experiences. To achieve this, the hotels group is supported by Amazon Web Services (AWS) technologies and uses scalable cloud solutions, along with smart Internet of Things devices which run on Artificial Intelligence (AI). Accor hosts millions of traveling customers in 5,200 hotels in 110 countries around the world, with the capacity to open one new hotel every day.

Accor Uses AI to Enhance Customer Experience

2

At [Accor's Mercure London Hyde Park](#) hotel, the hotels group has strengthened their operational effectiveness and improved its customer service by equipping each of its charming rooms with AI-based devices which run on AWS. AI is the electronic science domain which is dedicated to resolving cognitive issues which are usually associated with human intelligence, particularly learning, problem-solving and model recognition.
