

# AXA on AWS

AXA Group (AXA) is a leading international insurance organization headquartered in France with nearly 150,000 employees and a presence in 60 countries. It started its cloud journey in 2016 and now drives its ongoing digital transformation using Amazon Web Services (AWS). The business has accelerated its cloud adoption by creating a custom global landing zone following AWS best practices and using a range of services. This has given its 100 operating companies autonomy in innovation while ensuring a standardized and secure approach globally. AXA continues to innovate in the cloud by exploring services such as machine learning (ML) and business intelligence on AWS to deliver the next generation of insurance to customers worldwide.

Data Protection

## AXA Germany Puts Data Protection at the Heart of Its Digital Transformation

AXA Germany's chief security officer (CSO) leads the company's security unit: care, protect, alert, and safeguard customer data in the cloud. In a recent interview, the CSO discusses the challenges of meeting the Supervisory Authority (BaFin) requirements for the Data Protection Regulation (GDPR). Here, the CSO talks to Noack and Marco Becker, head of security in the cloud.

Hi, I can connect you with an AWS representative or answer questions you have on AWS.
