

eHealth NSW

eHealth NSW on AWS

As the information and communications technology provider for the New South Wales (NSW) public health system, [eHealth NSW](#) supports the vital work of healthcare delivery to patients across the region. eHealth NSW moved its on-premises infrastructure to AWS to drive innovation, reduce costs by millions of dollars, and save more than 144,000 hours of productivity for front-line providers. With ten times the performance improvement in its patient records system, medical professionals get fast access to clinical data resulting in better care and outcomes.

NSW Leveraging Digital Platforms and Capabilities in Everyday Work

Dr. Zoran Bolevich shares how NSW Health uses the cloud to serve over 8 million people across 228 hospitals. By becoming "digital on the inside," NSW Health staff leverage digital platforms and capabilities in their everyday work. By working with AWS, NSW Health aims to empower patients and citizens to become active participants in their health and wellbeing. NSW Health has an enterprise data lake hosted on AWS.

centralised repository storing vast amounts of structured and unstructured data from multiple systems, both clinical and corporate.

Digital transformation of health will depend on the ability to adopt and leverage the power of the cloud. Health IT is on the cusp of becoming a cloud enabled and patient centric digital health, so let us work together to accelerate that transition. The future of health depends on it."

Dr. Zoran Bolevich

Chief Executive, eHealth NSW & CIO, NSW Health eHealth

eHealth NSW Transforms Public Health System with the Cloud

eHealth NSW has realized significant benefits and accelerated the digital transformation of NSW Health by moving mission-critical workloads to the cloud with support from [AWS Professional Services](#). From cost reductions of US\$16 million to more than 144,000 hours of clinicians' time saved, eHealth NSW is delivering greater performance, efficiency, and security.

We worked closely with the AWS Professional Services team to modernize our infrastructure, allowing us to redirect our resources toward improving the features of clinical and delivering greater value to the state healthcare system."

2021

eHealth NSW supports NSW Health Pathology Transforming their Public Health System with the Cloud

NSW Pathology created an AWS-powered SMS automated notification service that delivered COVID-19 test results to millions of patients rapidly and at scale. By leveraging AWS, NSW Health Pathology rapidly deployed an innovation that significantly improves the patient experience and public health response during the pandemic, demonstrating the power of cloud technology to enable nimble solutions.

About eHealth NSW

As NSW Health's digital centre of excellence, eHealth NSW provides world-class ICT systems for Australia’s largest health system. These systems supports the vital work of healthcare delivery to more than 8.2 million citizens across the state. eHealth NSW migrated their most mission critical clinical systems to AWS to improve operational efficiencies, drive innovation, delivering millions in avoided capital expenditure and saving more than 144,000 hours of productivity for front-line providers. With ten times the performance improvement in its patient records system, clinicians are able to gain access to clinical data faster, resulting in better care and patient outcomes.
