Omnichannel customer experience specialist Genesys uses Amazon Web Services (AWS) for foundational and generative artificial intelligence (AI). Joe Smith, the company's senior vice president for research and development for digital and AI, discusses the integration of Amazon Bedrock to enhance the Genesys platform while helping ensure compliance with standards like the General Data Protection Regulation (GDPR). With access to foundational models like Anthropic AI and Titan, Genesys can optimize AI for high-volume, low-latency workloads, processing 1.5 billion monthly calls in real time.
