iFood: an Artificial Intelligence (AI) journey with AWS

One of the largest Brazilian delivery ma
establishments, [iFood](#) used generative a
business. The first concerns the customer experience personalization, where those customers are responsible
for more than 80 million orders per mo
developers. Thiago Cardoso, iFood data
artificial intelligence (AI) is the only effi

Hi, I can connect you with an AWS representative or
answer questions you have on AWS.

Need more info? Highlight any text to get an
explanation generated with AWS generative AI.

In this video, Cardoso talks about how the company, which generated 0.5% of the Brazilian Gross Domestic Product (GDP) in 2022, uses services such as [Amazon Bedrock](#) and [Amazon SageMaker](#) to, on the one hand, standardize and facilitate implementations and, on the other, optimize the customer experience, from the moment the order is placed until delivery and in fraud prevention processes. In all, according to the director, when a user enters the app and makes a purchase through iFood, they go through more than 100 AI models. Learn the details of this story and iFood's future plans with for AWS generative artificial intelligence (AI).

Amazon Bedrock

Amazon Bedrock is a fully managed service that offers several high-performance foundation model (FM) options from leading AI companies, such as AI21 Labs, Anthropic, Cohere, Meta, Stability AI and Amazon, through a single API, plus a broad set of features needed to create generative AI applications with security, privacy, and responsible AI.
