

Dream11 on AWS

Dream11 is the world's largest fantasy sports platform with more than 220 million users playing fantasy sports ranging from cricket and football to kabaddi and basketball. The flagship brand of Dream Sports, India's leading sports technology company, it has partnerships with several national and international sports bodies and cricketers. Using Amazon Web Services (AWS), Dream11 has supported its expansion, developing new features and services fast and protecting users from disruption. Its Scaler tool combined with AWS technologies help it scale dynamically and cost-effectively to handle millions of requests a minute and hundreds of sporting events a day.

[Dream11](#)'s seamless fantasy sports experience is supported by Amazon Web Services (AWS), with a secure infrastructure that scales to handle hundreds of events a day with 99.99 percent application uptime. A data-driven approach means Dream11 can quickly deliver innovative features to more than 220 million sports fans.

At Dream11, we use both Application Load Balancers and Classic Load Balancers to manage all incoming traffic to our platform. With over 100 load balancers processing more than 65 billion requests per day across microservices, we ensure high availability and scalability to meet the demands of our users seamlessly."
