

TUI Group on AWS

Leisure and tourism business TUI Group operates 1,600 travel agencies, 400 hotels, 16 cruise ships, and 5 airlines —helping millions of customers discover hundreds of destinations globally. One of the largest travel companies in the world, it migrated to Amazon Web Services (AWS) in 2017 to build a modern infrastructure for cutting-edge travel services. The firm has boosted development speed and innovation, and delivered services at scale using AWS Lambda. With artificial intelligence (AI) playing an increasingly important role, TUI builds, trains, and deploys machine learning models on Amazon SageMaker to personalize recommendations and create amazing traveler experiences. AWS—TUI’s primary cloud provider—gives the business expert support to help shape its successful roadmap in the cloud.

TUI delivers high quality content in under 10 seconds with Amazon Bedrock

TUI, a leading travel company, saw an opportunity to improve the quality and speed of its content generation. Marc Jennings and his team chose Amazon Bedrock for its secure environment, cost control, governance, and scalability. By using Bedrock to generate hotel descriptions and Claude for content moderation, TUI reduced content generation time from 8 hours to under 10 seconds while maintaining quality standards.
