

Taptap Digital Accelerates Customers' Advertising Success with Generative AI Using AWS

Contact Us

"We now use generative AI to power our predictive modelling capabilities enabling our clients to achieve advertising success at scale. AI and machine learning are crucial to our business. AWS is a critical partner that allows us to analyse and understand big data sets and predict with precision in real time."

Álvaro Mayol

General manager, Taptap Digital

Hi, I can connect you with an AWS representative or answer questions you have on AWS.

TapTap Digital: Advertising Solutions That Harness Generative AI in the AWS Cloud

For advertisers, modelling past consumer behaviour along with live contextual signals is the most accurate way to predict future outcomes. To do this, they need the type of real-time data intelligence—and activation—that [TapTap Digital](#)'s predictive advertising technology provides. To drive more effective omnichannel media campaigns that help advertisers find who and where their next and best customers are, the company processes around 100,000 requests per second. It relies on the high availability and global reach of Amazon Web Services (AWS) to deliver real-time intelligence, reliably. Álvaro Mayol Garrido, chief technology and chief product officer, says TapTap also uses AWS tooling which can help customers protect data and user privacy in line with European Union General Data Protection Regulation (GDPR). At the forefront of its fast-moving industry, TapTap is using generative artificial intelligence and machine learning in AWS to maintain a rapid pace of innovation.

Leading Cloud Innovators in Europe

Learn how leading organizations in Europe across industries truly drive innovation at every level of their business.

Get Started

Organizations of all sizes across all industries are transforming their businesses and delivering on their missions every day using AWS. Contact our experts and start your own AWS journey today.
