

AWS re:Invent 2023

Anthropic at AWS re:Invent 2023

Hi, I can connect you with an AWS representative or answer questions you have on AWS.

Need more info? Highlight any text to get an explanation generated with AWS generative AI.

In this AWS re:Invent 2023 fireside chat, Selipsky, CEO of Amazon Web Services (responsibly deploy generative artificial intelligence large language models with a focus on safe, steerable, and reliable solutions. Anthropic's foundation model, Claude, is available to AWS customers through [Amazon Bedrock](#) for a broad range of cases.

Anthropic began using AWS in 2021 to train its first model. Today the company leverages AWS as its primary cloud provider to support mission critical workloads. Anthropic is using high-performance, low-cost compute — provided by [AWS Trainium](#) and [AWS Inferentia](#) chips — to develop and train its future foundation models.

AWS customers across industries are choosing Claude on Amazon Bedrock for its unique features and capabilities. Claude 2.1 provides customers with an industry-leading long context window of 200,000 tokens, the equivalent of over 150,000 words or 500 pages, as well as the ability to customize and fine tune models using their own data. For example, through Amazon Bedrock, Claude is used by LexisNexis for AI-powered legal search features, by Pfizer for biomedical research, and by Bridgewater Associates for an investment analyst assistant.

Anthropic’s commitment to safety by design is evident in its organizational structure – over half of the research team is dedicated to AI safety. By pioneering techniques like Constitutional AI, advocating for both internal and external red-teaming of AI systems, and publishing a Responsible Scaling Policy, Anthropic aims to build the safest and most technically sophisticated AI systems available.

About Anthropic

Anthropic is an AI safety and research company that's working to build reliable, interpretable, and steerable AI systems.
