Cloud Fluency at Scale

As Techcombank began its migration to AWS, the company faced a shortage of in-house cloud skills, as well as in the broader workforce in Vietnam. Leveraging [AWS Skills Guild](#), a comprehensive skills enablement program, Techcombank built its in-house cloud competency, increasing employee engagement, and driving cloud fluency at scale. With a mix of AWS classroom training and informal training events, it grew cloud knowledge and hands-on skills across the business, aligning more closely with the company’s digital and cloud transformation ambitions and introducing in a new culture of cloud innovation.

Faster Provisioning

As a direct result of cloud training, the time to provision a new environment has been reduced from over a month to just five days on AWS.

Reduced Operational Cost

After learning and applying new skills, the team at Techcombank was able to optimize and reduce their Amazon Elastic Cloud Compute (Amazon EC2) spend by 20%.

Cloud Culture

With the broad uptake of cloud education, people all across the business are speaking the same cloud language, resulting in more effective collaboration and more innovative thinking.

Cloud Champions

As part of the program, Techcombank also trained 28 Cloud Champions. These dedicated cloud enthusiasts are ready to support employees in their learning journeys by facilitating study groups and providing one-on-one coaching.
