Traditionally, hailing taxis outside of major cities in Taiwan is challenging. In smaller cities and outside the train stations, but are not between otherwise. Passengers had to make a voice call and state pickup location to get a taxi if they needed. Even with automated options such as p

ABOUT TAIWAN TAXI

About Taiwan Taxi

Taiwan Taxi, founded in September, 2005, is the largest taxi company in Taiwan. The company serves around 350,000 customers through the taxi dispatching platform receiving more than 120,000 hotlines per day. The company provides taxi service around the island with running more than 10,000 taxis, accounting for 19% in taxi industry in Taiwan.

Industries: Other

registered local passengers incur charges to complete booking. Riding c increasing popularity of mobile apps, Taiwan Taxi decided to be the first taxi company in Taiwan to offer passengers a more convenient way to book taxis.

Location: Taiwan

Google Maps Platform

with. It supports
cross-platform
development
and pinpoints
locations in
under five
seconds. It is
also highly
reliable and the
maps are always
current...

Passengers can
be assured of
their safety
when they travel
with us. Google
Maps allows us
to track their
locations no
matter where
they are."

—Len Nan, Senior
Manager, Business
Support Department,
Taiwan Taxi

Passengers clearly like the mobile apps, with the proportion of bookings coming through the app increasing from 30% to 72% since 2012. As mobile data plans offer unlimited usage of data in Taiwan, passengers can save on call charges when they make an app-based booking. Passengers using the mobile apps do not have to input a pickup location when they book a taxi, which is extremely helpful when they are in unfamiliar neighbourhoods. They can also add landmarks to their mobile bookings so the drivers know exactly where they are. Once a taxi has been assigned, passengers can also estimate arrival times and their taxi's location on a Google Map.
